Professional Summary

Third-year B.Tech Computer Science and Engineering (Data Analytics) student at VIT-AP University with a 9.02 CGPA. Strong foundation in Java, Python, SQL, Data Structures, Algorithms, Object-Oriented Programming, and Machine Learning. Built software and AI-driven applications through academic projects and actively seeking Software Engineering internship opportunities.

Education

Bachelor of Technology (B.Tech)

Computer Science and Engineering (Data Analytics)

VIT-AP University

CGPA: 9.02

Expected Graduation: 2028

Technical Skills

Programming: Java, Python, SQL, R

Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Data Analytics & ML: Pandas, NumPy, Scikit-learn, Machine Learning, EDA, Feature Engineering, Statistical Analysis, Data Visualization

Generative AI: LLMs, Prompt Engineering, Few-shot Prompting, Chain-of-Thought Prompting, AI-assisted Development

AI Tools: IBM Granite, Hugging Face, GitHub Copilot, ChatGPT, Jupyter Notebook

Development Tools: MySQL, SQLite, Git, GitHub, VS Code

Projects

Predictive Analytics for Mental Health Risk Assessment

April 2026

- Developed a machine learning model achieving **85% prediction accuracy** for student mental health risk assessment.
- Analyzed **198+ student responses** using Python, Pandas, NumPy, SQL, and R.
- Performed preprocessing, feature engineering, EDA, statistical analysis, and model evaluation using Scikit-learn.
- Built an end-to-end analytics pipeline and generated actionable insights through visualizations.

Driver Fatigue Detection System

November 2025

- Developed a real-time fatigue detection system using Arduino Nano, IR Eye Blink Sensor, GPS, and GSM modules.
- Implemented continuous eye-blink monitoring with instant buzzer alerts.
- Integrated GPS and GSM to send live location through SMS during fatigue detection.
- Validated the system under multiple driving scenarios to improve reliability and road safety.

Certifications

- IBM Advanced Generative AI

July 2026

Technical Experience

- Developed software and data analytics projects using Java, Python, SQL, and R.
- Applied OOP, DBMS, and software engineering principles to design and implement end-to-end solutions.
- Collaborated with peers to design, develop, test, and document software solutions.

Relevant Coursework

- Data Structures • Algorithms • DBMS • Operating Systems • Computer Networks • Software Engineering • Machine Learning • Data Mining
